

2024 GOLF PRODUCT GUIDE

Trusted by the Best

JOHN DEERE

ALL THE SIGNALS ARE NOW CLEAR.

John Deere Connectivity Solutions

Over the years, we've learned a few things. Most notably, this:

When everything is connected, data drives efficiency and productivity. And suddenly everything gets so much more manageable. Here's how:

CONNECT. Get the most with John Deere Connectivity solutions. You'll find mowers that know when they're in need of routine maintenance, tell you where they've been and where they are, and even let you know how long they've been working.

GUIDE. Let the data guide you. You'll have GPS Sprayer Solutions that offer levels of precise application, efficiency and productivity that have never been seen before, and information about labor and equipment management right at your fingertips. With this data, you can work with your dealer to create new levels of excellence.

MANAGE. Thanks to cutting-edge John Deere Golf Course Equipment Management Solutions, you'll bring it all together, doing what you do every day, just more easily. You'll even discover technologies that help minimize variations in performance from operator to operator.

The future is electric. And cutting edge.

There's a quiet, new strength coming to golf courses. Where the finish is everything. And that's just a beginning to what's new—hybrid technology is growing on the fairways and electric equipment is revolutionizing greens, approaches and tee boxes.

The foundation is strong.

We've built a tradition of trust and excellence on fairways and greens all over the world. We've built that trust with exceptional equipment; reliable, attentive support; financial solutions based on your course's operational needs; and a commitment to the great game of golf that's as intense as your own. All of which helps explain why we're Trusted by the Best.

The future of golf is connected.

Be part of the future of golf. We're looking forward to connecting with you about your course, soon.

Visit [Explore.deere.com/golf](https://www.deere.com/golf) for more information. Or talk to your local dealer today.

What's New is Electric. And Cutting Edge.

7700A E-CUT™ HYBRID FAIRWAY MOWER

The 90% reduction of hydraulic leak points, reduced fuel consumption and less engine noise compared to PrecisionCut™ models is time-tested and proven. The power, control and connectivity are cutting edge. All with a 100-in (254 cm) width of cut designed for the rigorous applications of QA7 reels, including scalping and verticutting.

6700A E-CUT™ HYBRID FAIRWAY MOWER

The three-wheel stance is highly maneuverable. The three-wheel drive is standard. The hybrid technology is tried and true. The QA7 reels make this new model designed for the rigorous applications of mowing, scalping and verticutting.

GATOR™ GS ELECTRIC UTILITY VEHICLE

No gasoline fill ups. No oil changes. Zero emissions. Quiet operation. An 800 lb (362.9 kg) cargo box capacity. A narrow stance. We're quietly introducing a strong new addition to our Golf Utility Vehicle lineup.

GATOR™ GS UTILITY VEHICLE

Another strong new addition to our Golf Utility Vehicle lineup, you'll get a 800 lb (362.9 kg) cargo box capacity, narrow stance, and suprisingly quiet operation in a gas-powered model.

TRUFINISH™ 1220 UTILITY RAKE

The finish is now everything in your bunkers or on your infield skin, thanks to the new TruFinish™ 1220 Utility Rake with three mid-mount rake options, five rear rake choices, selectable 2WD or 3WD and more.

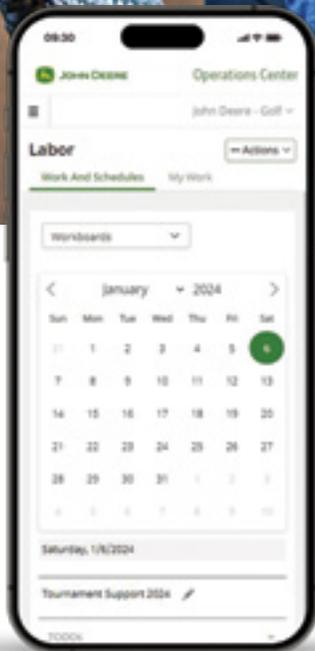

185 E-CUT™ ELECTRIC WALK GREENS MOWER

225 E-CUT™ ELECTRIC WALK GREENS MOWER

No fuel consumption, no engine oil and virtually silent operation. That's just the beginning of what you get with the new 185 E-Cut™ and 225 E-Cut™ Electric Walk Greens Mowers. With an estimated 50,000 square feet mowed on a single charge, we're making a statement on greens, approaches and tee boxes everywhere. All with an 18-in (45.7 cm) or 22-in (55.9 cm) width of cut.

WHEN ALL YOUR DATA IS IN ONE PLACE,
YOU CAN BE ANY PLACE.

Connect. Guide. Manage Like Never Before.

Utilizing data from your John Deere PRO Golf tools—and as other integrated third-party software—John Deere PRO Golf allows you to keep track of:

- Staffing, crew hours and overtime
- Equipment maintenance schedules
- Irrigation costs
- Weather updates
- And much more

Real-Time Decision Making

With one hub for all your data, you can make informed decisions in real-time, improving efficiency, lowering costs, and becoming more sustainable, no matter where you are.

Fully Customizable Dashboard

John Deere PRO Golf gives you the ability to enter additional data such as soil moisture, water usage, and greens speed. John Deere PRO Golf also integrates with these industry software solutions to simplify—and even automate—data entry:

- **Playbooks** – Fertilizer and chemical costs, product inventory
- **POGO** – Soil moisture, EC and soil temperature readings
- **Foretees** – Rounds played with player details
- **Spectrum Technologies** – Soil moisture, EC and soil temperature readings
- **The Weather Company** – Current and forecast conditions

Labor Management

Now you can run your crew like never before, assigning work, making adjustments and viewing reporting from any device. Your people are your most powerful resource, so make the most of what they bring to the table with John Deere PRO Golf.

Easy Job Board Updates

No more whiteboards. Adjust staffing needs or job assignments easily on the digital workboard, with your team able to remotely access new updates.

Real-Time Crew Communication

With John Deere PRO Golf, your crew can see their assigned work right from their mobile phone, phone—personalized to them—so they always know where they need to be.

Manage Staffing Costs

With alerts and color-coded indicators, you'll know when overtime hours/costs are approaching your budget thresholds and can act quickly.

Real-Time Reporting

Gain great insight into how efficiently the operation is running with automated reports for dollar allocations, man-hours and even overtime, all easily exported to Microsoft Excel.

One Fully Integrated Dashboard. It's All Here.

When you combine labor, equipment, weather and other data elements, you can make data-driven decisions to manage your entire operation like never before.

That means:

- More cost-effective use of labor and equipment resources
- Real-time decision-making so you can make adjustments quickly
- The control to know that you're always on top of your course management

And it's all customizable to work the way you do, no matter where you're working.

Fleet Management

The quality of the equipment is half the battle. The other half is managing it efficiently. John Deere PRO Golf gives you the data to do just that—monitor maintenance schedules, engine hours, location history, and more.

Scheduled Maintenance and Repairs

Stay on top of equipment maintenance with up-to-date schedules for John Deere equipment, plus easily add on-demand work orders for any make equipment. Your equipment manager or technician will have all the information they need to keep your fleet running in peak condition.

Maintenance Schedule Monitoring

Upcoming services are color-coded, helping you prioritize work within the shop and take command of your fleet maintenance.

Trusted by the Best

Engine Hours Update

Balance equipment usage across the entire fleet by quickly and easily updating equipment engine hours from any internet connected device.

Parts Inventory Connectivity

Parts inventory is now seamlessly integrated with your process. John Deere PRO Golf automatically logs which parts you use, alerts you when inventory is low, and connects you with the John Deere online parts catalog.

Reports

Real-time automated reports mean you'll always know the status and performance of your equipment, from equipment use and availability to cost of ownership, all easily exported to Microsoft Excel. With this data, you can make better decisions on purchasing or leasing, fleet size, and more.

Connected Machines

With John Deere PRO Golf, you'll know where your equipment is, where it's been, and how long it's been running so you can operate at peak efficiency.

Equipment Location

Monitor performance, progress and location of your fleet from any internet connected device. Now you can make more informed decisions about the day's activities, identify opportunities for adjustments and improve efficiency.

Location History

Color-coded location history information gives you insights to identify areas of concern and opportunities for efficiency improvements such as route planning, operator training, and more.

Automatic Engine Hour Updates

Engine hours within the fleet page update in real-time, eliminating the need for time-consuming manual entry.

Enhanced Dealer Support

New to John Deere PRO Golf, now you can give your dealer permission to view your equipment data and help with maintenance strategy. This brings a new level of expert support to your operation.

OnLink joins the John Deere Operations Center™ suite of digital tools as John Deere PRO Golf.

For more information or to schedule a demo, visit [explore.deere.com/experience-progolf](https://www.explore.deere.com/experience-progolf)

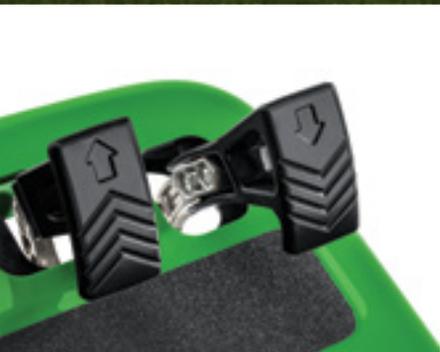

Take Command of Your Equipment

With the power of the new John Deere Operations Center™ PRO Golf platform, you'll know exactly where your equipment is, how much it's being used, and when it needs maintenance. And you can see it all in one customizable dashboard.

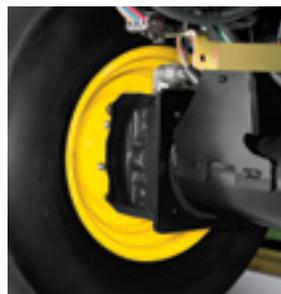

Fairway, Rough, and Trim and Surrounds mowers

Now your presence can be felt on every part of your course. That's the control you get with the latest mowers from John Deere. Thanks to our Connectivity Solutions, you'll get the latest in golf course labor and fleet management technology. Then there's our passcode-protected TechControl display to easily program your mowers to mow and turn at preset speeds, transport at preset speeds and lock in fuel savings, no matter who is operating the mower. You can also plug in service reminders and get diagnostic feedback quickly and accurately. All so your operators can perform more confidently and consistently.

Automotive-style operation

The AutoPedal™ system features ergonomic twin pedals that control both forward and reverse direction as well as the engine, eliminating the need for a separate throttle. Similar to a car, the further the pedal is pressed, the more the engine speed and travel speed of the unit increases in transport.

Reliable and durable

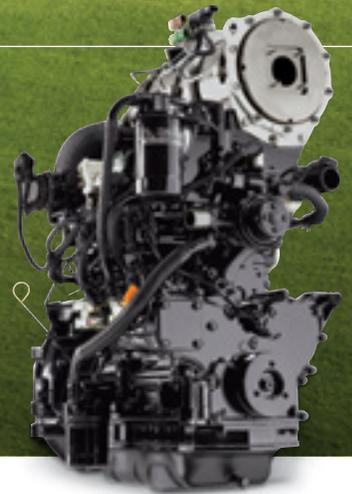

The front internal wet disc brakes on these models do not have brake linkages or need adjustments, reducing the need for routine maintenance. And each machine has enhanced corrosion-resistance features throughout.

But that's only part of the story. There's the proven technology you get with our E-Cut™ Hybrid Fairway mowers, including the new 6700A E-Cut™ Mower and new 7700A E-Cut™ Mower with QA7 reels designed for mowing, scalping and vericutting excellence. The versatility of our Trim and Surrounds mowers. The superior contouring deck system on our Rough mowers. The excellent after-cut appearance and comfortable operator stations. And so much more.

Tier 4-compliant engines

Engines above 25 hp include a diesel oxidation catalyst and diesel particulate filter. Engines below 25 hp save on up-front purchasing costs as these components are not required.

Faster entry and exit

Getting on and off these machines is now a breeze thanks to the conveniently placed fore and aft steps. And nothing could be more comfortable than getting in the seat. There's more leg room, a wider front platform, tilt steering, and a deluxe seat.

Efficient maintenance = increased uptime

With our Quick Adjust cutting units, adjustments take mere minutes. And when you consider all the diagnostic features of our TechControl display, your technicians can better manage service timelines and keep your fleet up and running.

8900A PrecisionCut

PrecisionCut™ Fairway Mowers

The PrecisionCut Fairway Mowers offer several features that separate them from the competition. Like the eHydro™ hydrostatic pump and large capacity motors for serious hill-climbing capabilities. But that's just for starters. Optional on the 7500A, 7700A, and 8700A and standard on the 6080A, 6500A, and 6700A, the GRIP All-Wheel Drive Traction System minimizes wheel slippage to protect fairways everywhere. Then, there's LoadMatch™, which helps helps cut through wet, lush grass evenly by slowing down the traction speed to provide more power to the cutting units. Plus, all are compatible with John Deere Connectivity Solutions for the latest in Golf Course Management technology.

Getting on or off these mowers is no problem, thanks to easy entry and exit points. And there are plenty of operator comfort features, like foot-operated tilt steering and a deluxe suspension seat with multiple adjustments for all-day productivity.

7500A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- AutoPedal™ system
- 41.6 hp (31.0 kW)⁶ diesel engine
- 5-in (12.7 cm) diameter reels
- 100-in. (254 cm) cutting width
- US/CAN Tier 4 compliance

7700A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- AutoPedal™ system
- 41.6 hp (31.0 kW)⁶ diesel engine
- 7-in (17.8 cm) diameter reels
- 100-in (254 cm) cutting width
- US/CAN Tier 4 compliance

8700A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- AutoPedal™ system
- 51.1 hp (41.1 kW)⁶ diesel engine
- 7-in (17.8 cm) diameter reels
- 100-in (254 cm) cutting width
- US/CAN Tier 4 compliance

8900A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- AutoPedal™ system
- 51.1 hp (41.1 kW)⁶ diesel engine
- 7-in (17.8 cm) diameter reels
- 114-in. (289.6 cm) or 130-in (330.2 cm) cutting width
- US/CAN Tier 4 compliance

Trusted by the Best

CONNECTIVITY

6700A PrecisionCut

Our fairway mower lineup includes the 6080A, 6500A, and 6700A. These reasonably priced, 24.7 hp (18.2 kW) units have a lot going for them—the passcode-protected TechControl display, allowing you to control mow speed, turn speed, and more; LoadMatch™ for excellent cut quality in tough conditions; and our direct drive eHydro™ traction system, electronically controlled with no belts or linkages. Plus, all three units are built on a true fairway mower frame for toughness.

6080A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- 3-wheel, smooth tire configuration
- Standard GRIP AWD
- 24.7 hp (18.4 kW)⁶ diesel engine
- 5-in. (12.7 cm) diameter reels
- 80-in. (203 cm) cutting width
- US/CAN Tier 4 compliance

6500A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- 3-wheel, smooth tire configuration
- Standard GRIP AWD
- 24.7 hp (18.4 kW)⁶ diesel engine
- 5-in. (12.7 cm) diameter reels
- 100-in. (254 cm) cutting width
- US/CAN Tier 4 compliance

6700A

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- 3-wheel, smooth tire configuration
- Standard GRIP AWD
- 24.7 hp (18.4 kW)⁶ diesel engine
- 7-in. (17.8 cm) diameter reels
- 100-in. (254 cm) cutting width
- US/CAN Tier 4 compliance

6700A E-Cut Hybrid

E-Cut™ Hybrid Fairway Mowers

John Deere E-Cut™ Hybrid Fairway Mowers take high-performance hybrid technology to the next level. Our E-Cut™ Hybrid technology uses a 56-V alternator to power the cutting units via electric motors, eliminating all hydraulic leak points from the reel circuit, where 90 percent of all hydraulic leaks occur. Also, the 8000A, 7500A and 7700A can be set through the passcode-protected TechControl display to automatically operate at a reduced throttle of 2300 rpm for noise reduction and fuel savings. Plus, all are compatible with John Deere Connectivity solutions for the latest in Golf Course Management technology.

Fairway hybrid units include the 6080A, 6500A and 6700A E-Cut™ Hybrid Fairway Mowers as well. All three are 24.7 hp (18.2 kW⁶) and feature 80-in. and 100-in. cutting widths in a 3-wheel, smooth tire configuration.

With our new 6700A and 7700A E-Cut™ Hybrid Fairway mowers, the lineup has never been better positioned for mowing, scalping and vericutting excellence.

6700A E-Cut™ Hybrid

- 24.7 hp (18.4 kW) diesel engine
- 3-wheel smooth tire configuration
- Passcode-protected TechControl
- 100-in. (254 cm) cutting width
- 56 volt, 240 amp alternator
- 7-in (17.8 cm) diameter reels
- Mow, scalp and vericut capabilities
- US/CAN Tier 4 compliance

7700A E-Cut™ Hybrid

- Passcode-protected TechControl
- AutoPedal system
- 41.6 hp (31.0 kW) diesel engine
- 100-in. (254 cm) cutting width
- 56 volt, 240 amp alternator
- 7-in (17.8 cm) diameter reels
- Mow, scalp and vericut capabilities
- US/CAN Tier 4 compliance

6080A E-Cut™ Hybrid

- 24.7 hp (18.4 kW)⁶ diesel engine
- 3-wheel smooth tire configuration
- Passcode-protected TechControl
- 80-in. (203 cm) cutting width
- Set mowing, turn, and transport speeds
- 5-in. (12.7 cm) diameter reels
- US/CAN Tier 4 compliance

6500A E-Cut™ Hybrid

- 24.7 hp (18.4 kW)⁶ diesel engine
- 3-wheel smooth tire configuration
- Passcode-protected TechControl
- 100-in. (254 cm) cutting width
- Set mowing, turn, and transport speeds
- 5-in (12.7 cm) diameter reels
- US/CAN Tier 4 compliance

7500A E-Cut™ Hybrid

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- AutoPedal™ system
- 41.6 hp (31.0 kW)⁶ diesel engine
- 5-in (12.7 cm) diameter reels
- 100-in. (254 cm) cutting width
- US/CAN Tier 4 compliance

8000A E-Cut™ Hybrid

- Passcode-protected TechControl
- Set mowing, turn, and transport speeds
- 3-wheel, low-PSI smooth tire configuration
- 41.6 hp (31.0 kW)⁶ diesel engine
- 5-in (12.7 cm) diameter reels
- 80-in. (203 cm) cutting width
- US/CAN Tier 4 compliance

Trusted by the Best

6500A E-Cut Hybrid

No Mowers Generate More Confidence

Eliminating the possibility of a hydraulic leak in the reel circuit is just the beginning. E-Cut™ Hybrid technology delivers a cut that can be generated only by electricity. The reel speed always stays rock steady for a consistently ideal quality of cut. So your course always looks pleasing to the eye and plays evenly as well. Then, there's John Deere Connectivity Solutions for the latest in Golf Course Management technology.

No one else in the golf course industry can match our experience and expertise with hybrid mowers. And, our Connectivity Solutions are second to none. From fairway mowers to triplex mowers to walking greens mowers, only John Deere can give you the trust and confidence that comes with these remarkable technologies. Your fairways and greens are the highlights of your course. Give them the technology they deserve to look their very best—every day, every season, every year.

Exceptional cut quality. Consistently.

E-Cut™ Hybrid technology delivers a cut that can be generated only by electricity. The reel speed always stays rock steady for a consistently ideal quality of cut.

Simple for your crew to make the switch

Thanks to maintenance-free electric motors, no hydraulic lines in the reel circuit, and all the standard benefits of John Deere reel mowers like Quick Adjust cutting units.

Proven hybrid performance

Since 2005, E-Cut™ Hybrid technology has been earning the trust of courses all over the world, thanks to design features like separating controllers from the motors to prevent overheating.

More sustainable technology

With E-Cut™ Hybrid technology, these mowers can run at reduced throttle to save fuel and reduce noise levels.

7200A PrecisionCut

7200A PrecisionCut™ and 7400A TerrainCut™ Trim & Surrounds Mowers

These two mowers change the way trim and surrounds areas are maintained. Both the 7200A and 7400A are Final Tier 4 compliant and feature the exclusive Width On Demand system, right at the operator's fingertips.

Operators can change the width of cut on the go with the simple toggle of a switch. And both mowers also have the Reach Trimming System, which allows you to extend either the front left or front right deck up to 15 in. beyond the outside edge of the tire, so you can trim around bunkers and other areas.

Rear roller power brush
Prevents accumulation of grass clippings and other debris on the rear roller.

Fairway/Greens Tender™ conditioner
Slices stolons, controls grain, and delivers a truer playing surface.

Rollers
A full selection of spiral-grooved, continuous-grooved, and solid options.

A Revolution in Time Savings

Speed Link™ Cutting System

The reels on all our greens, trim, and fairway mowers make all adjustments quick and easy, thanks to a revolutionary Speed Link system that makes it possible to adjust height of cut to both sides of the cutting unit in no time. A linking bar connects both sides of the rear roller to a high-reduction ratio worm gear, allowing one-thousandth-of-an-inch adjustments to be made to both sides of the roller simultaneously just by using a cordless drill (or 16 mm wrench).

14-blade reel

QA5 5-inch Diameter Reel

Ideal for lower heights of cut

18- or 22-in. widths

Quick bedknife-to-reel adjustment

7-, 11-, or 14-blade reels

Interchangeable across the line, a real cost-saver

QA7 7-inch Diameter Reel

Ideal for warm- and lush cool-season grasses on tees, fairways surrounds, approaches, and roughs

22-, 26-, or 30-in. widths

Quick reel-to-bedknife adjustment

8- or 10-blade reels

9009A TerrainCut

9009A TerrainCut™ Rough Mower.

Until now, using a wide-area mower in the rough meant compromising on your quality of cut. But with our 9009A TerrainCut mower, you can maximize both your productivity and cut quality.

With a 108-inch/9-foot cutting width, the 9009A is a five-gang, 27-inch (68.58 cm) independent rotary deck mower. A double-point yoke system on all five decks increases deck movement fore and aft, allowing for greater contour following and an even cut. And the 9009A has a greater deck overlap for superior side hill mowing.

The 9009A also sports a deeper deck design with a rear discharge for greater dispersion and a cleaner cut. And, our exclusive LoadMatch™ system lets you mow in thick, lush conditions. The 9009A also features the same passcode-protected TechControl display found on our Fairway mowers.

The TechControl lets you set precise mow, transport, and turn speeds while also allowing for quick and easy diagnostics.

Plus, the 9009A is compatible with John Deere Connectivity Solutions for the latest in Golf Course Management technology.

9009A TerrainCut Rough Mower

- TechControl display
- LoadMatch™ system
- 55.1 hp (41.1 kW)⁶ diesel engine
- 27 in. (68.6 cm) rotary decks
- 9-ft. / 108-in. (2.74m) cutting width
- US/CAN Tier 4 compliance
- Optional mulch kit
- Optional rear roller scraper kit

All height-of-cut adjustments on the 9009A can be performed without tools with an innovative notch system. All it takes is a simple pull of a lever.

The double yoke on the 9009A means the rotary decks follow the contours in the most undulating terrain for an exceptional quality and consistency of cut.

Our unique rear deck design allows for greater clippings dispersion and the deeper shell stands grass up for an even cut.

Passcode-protected TechControl display lets you precisely set mowing speed, turning speed, or transport speed for consistent performance.

The Rotary Deck Rear Discharge Design

9009A and 7400A TerrainCut™ 27-in. (68.6-cm) Mower decks feature an asymmetric rear discharge cutout design and molded chute to streamline airflow. These help with exceptional clipping dispersal and cut quality. In addition, the unique shape of the deck shell cutout has a heavily rounded opening on one side that gradually transitions to a larger opening on the other side. This helps the grass to exit the deck evenly with little-to-no deck congestion.

The design also features a deck structure along the bottom of the discharge area to help reduce sound power without interfering with cut quality. Plus, the design acts as a foot guard, eliminating the need for an external guard which can cause external grass build up that can be dropped in the mowing pass over time.

Cut quality is connected.

Second to none in cut quality and performance, the combination of the asymmetric deck shell discharge shape and asymmetric discharge chute minimizes clumping with smooth transitions while spreading discharge material in a dispersed pattern. The end result? Less clean up and blowing, allowing machines to mow earlier in the day. That can you save you time and labor.

Remember, proper blade selection for heights of grass, grass type and sharp blades is key to an improved cut quality and dispersal. The removal of no more than one third of the grass blade is recommended for healthy turf. Heavy growth times may require changing blades, mowing more often or raising the height of cut to improve clipping dispersal.

8800A TerrainCut

8800A TerrainCut™ Rough Mower

The 8800A has powerful features that allow it to stand out from other rough mowers, like a robust, 55.1 hp turbocharged diesel engine; an eHydro™ hydrostatic pump, combined with large displacement wheel motors, to deliver performance for excellent hill climbing; exclusive LoadMatch™ to help cut through thick, lush rough while maintaining a consistent traction speed; and internal wet-disc brakes that reduce maintenance and down time.

The 8800A features five solid, 21-in. rotary decks with optimal overlapping, rear roller striping, and no-tool height-of-cut adjustments. A double-acting, single-rod hydraulic steering cylinder makes keeping straight lines a breeze and steering effortless. Plus, the 8800A is compatible with John Deere Connectivity solutions for the latest in Golf Course Management technology.

POWERED BY JOHN DEERE OPERATIONS CENTER™ PRO GOLF

With the equipment management capabilities of John Deere PRO Golf, you'll always know where your equipment is, where it's been, how long it's been working, and when it needs maintenance. And all that information is on one customizable, mobile dashboard.

eHydro™

Thanks to the eHydro™ traction pump and large-capacity wheel motors, the 8800A can handle hill climbing with ease.

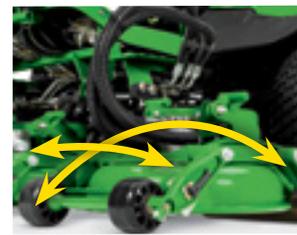

LoadMatch™

The LoadMatch™ setting through the Tech Control display allows the 8800A to achieve a consistent cut, even in long, lush conditions.

Power plant

The powerful 8800A has a maximum-rated horsepower of 55.1 and it is FT4 compliant.

Double-yoke design

The double-yoke design on the 8800A rotary decks allows for excellent contouring for the front decks.

220SL PrecisionCut™

SL PrecisionCut™ Walk Greens Mower: Fewer Steps to a Better Cut

Some of the lightest mowers in their class, the SL PrecisionCut walk greens mowers allow effortless turning, better engagement with the turf for a consistent cut and straighter tracking. Well-engineered cutting unit geometry provides the cleanest cut with minimal impact to the grass plant.

A new level of comfort and control

With updated 10-position fore/aft adjustable handlebars, operators can maximize performance while experiencing more comfort and easier maneuverability.

Fewer steps to adjust, easier to maintain

You can set height of cut with a cordless drill and switch rollers by simply removing two bolts.

Better turning, smoother steering

On SL PrecisionCut walk greens mowers, the distance from the rear drum to front roller is deliberately short. This, along with the low weight of the machine, reduces the effort needed to make turns and minimizes opportunities for scalping.

180/220/260SL

3.2 HP (2.4 kW), 122 cc^{2.5} gas engine

2.7 U.S. qt. (2.5 L)

5.2 mph (8.4 km/h) with transport wheels

5-in. (12.7 cm) diameter reels

18-in., 22-in. and 26-in. cutting widths

180 E-Cut™ Electric

Signature ball joint

Thanks to the signature ball joint mounting system, the cutting unit can rotate in any direction – fore/aft, laterally side to side, and 6 degrees of steering right and left.

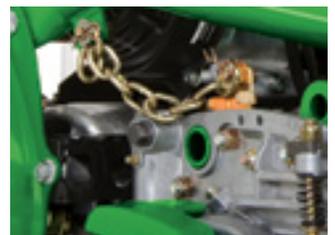

All electric and maximum control

The E-Cut™ Electric Mower passcode-protected TechControl™ display lets you precisely set mowing speed or turning speed for consistent performance.

Onboard backlapping

The motor can run the reel in reverse, eliminating the need to remove the reel or attach a separate motor.

Adjustable contouring

The limit chains also on the 180, 185, 220 and 225 E-Cut can be adjusted for a range of motion that can match the contours of any green.

E-Cut™ Hybrid and New Electric Walk Mowers: Follow Undulations Like Never Before

Available in both 18- and 22-inch (45.7 cm and 55.9 cm) widths of cut, our 180 and 220 E-Cut Hybrid walk greens mowers offer an unparalleled ability to follow contours and steer around the cleanup pass. Thanks to the signature ball joint mounting system, the cutting unit can rotate in any direction. Plus, with our new E-Cut™ Electric Walk Mowers, you can mow up to 50,000 square feet per charge with zero emissions and quiet operation.

180/220 E-Cut Hybrid

- 3.2 HP (2.4 kW), 122 cc^{2.5} gas engine
- Electric motor drive reel cutting unit
- 1-QA5 18-in. or 22-in. cutting unit
- 2.7 U.S. quart fuel tank
- Contour head design
- Adjustable frequency of clip
- Onboard backlapping

185/225 E-Cut™ Electric

- 58 volt, 3.56 Max kwh Lithium-ion battery
- Electric traction and reel drive
- 1-QA5 18-in or 22-in cutting unit
- Up to 50,000 sq ft on a single charge
- Contour head design
- Advanced passcode-protected TechControl display
- Frequency of Clip Control
- Clean Up Pass mode

POWERED BY JOHN DEERE OPERATIONS CENTER™ PRO GOLF

With the equipment management capabilities of PRO Golf, you'll always know where your equipment is, where it's been, how long it's been working, and when it needs maintenance. And all that information is on one customizable, mobile dashboard.

2700 Precision Cut™

Now, Every Operator Can Be Your Best Operator

Imagine a triplex mower that you can set up for a rookie operator to perform like a seasoned veteran. It's possible with the 2700 and 2750 PrecisionCut™ and E-Cut™ Hybrid Triplex Mowers. The key is the passcode-protected TechControl display system, giving you control over everything—mow speed, turn speed, even the cleanup pass. Plus, with the Frequency of Clip mode, you can achieve the same level of cut quality as a walk-behind mower, even on a hydraulic machine—a John Deere industry exclusive. And, no one matches this level of cutting unit contour following: 21 degrees up or down. In addition, the 2700 and 2750 are compatible with John Deere Connectivity Solutions for the latest in Golf Course Management technology.

2700 Precision Cut™

19.0 hp (14.2 kW), 694 cc^{2.3} EFI gas engine with electronic throttle control

Same cut quality, regardless of operator

TechControl advanced supervisory controls

Exclusive Frequency of Clip mode

Premium contour following

2700 E-Cut™ Hybrid

19.0 hp (14.2 kW), 694 cc^{2.3} EFI gas engine with electronic throttle control

Electric Reel Drive

Same cut quality, regardless of operator

TechControl advanced supervisory controls

Frequency of Clip mode

Premium contour following

2750 Precision Cut™

19.0 hp (14.2 kW)⁶ diesel engine with electronic throttle control

Same cut quality, regardless of operator

TechControl advanced supervisory controls

Exclusive Frequency of Clip mode

Premium contour following

2750 E-Cut™ Hybrid

19.0 hp (14.2 kW)⁶ diesel engine with electronic throttle control

Electric Reel Drive

Same cut quality, regardless of operator

TechControl advanced supervisory controls

Frequency of Clip mode

Premium contour following

Trusted by the Best

2750 E-Cut™ Hybrid

Frequency of Clip

In FOC mode, the reel speed automatically adjusts to the requested ground speed from the foot pedal. This means consistent cut quality from hole to hole all day long, regardless of operator.

Eco mode

In Eco mode, the engine will run as low as 2250 rpm with the PTO engaged. The result is up to 30 percent in fuel reduction. And, you'll see up to three decibels less in sound levels.¹

A better grass catcher

The grass catchers on these feature an innovative hook design. To remove it, simply push the catcher toward the operator station, then lift up, using only one hand. Available in yellow and traditional black.

Contour following

With its innovative 3-axis lift system, these triplexes stay on contours like no other. The cutting units feature 42 degrees of upward and downward movement. And, 36 degrees of steering and cutting unit lateral roll movement.

2550 E-Cut Hybrid

Eliminate Triplex Ring, one green at a time.

The 2550 E-Cut™ Hybrid, the 2400 PrecisionCut™, and the 2550 PrecisionCut™ Triplex Mowers feature offset cutting units that virtually eliminate triplex ring with a simple change in direction. They also deliver a consistent height of cut through contour following, weight transfer, and cutting unit suspension. Plus, they are compatible with John Deere Connectivity solutions for the latest in Golf Course Management technology.

2400 Precision Cut™

19.0 hp (14.2 kW), 694 cc^{2,3} gas engine

62-in. (157.5 cm) cutting width

3 cutting units; offset design

Bedknife-to-reel adjustment

3-QA5 22-in. (59.9 cm) cutting units

2-pedal hydrostatic transmission

2550 Precision Cut™

19.0 hp (14.2 kW)⁶ liquid-cooled diesel engine

62-in. (157.5 cm) cutting width

3 cutting units; offset design

Bedknife-to-reel adjustment

3-QA5 22-in. (59.9 cm) cutting units

2-pedal hydrostatic transmission

2550 E-Cut™ Hybrid

19.0 hp (14.2 kW)⁶ liquid-cooled diesel engine

62-in. (157.5 cm) cutting width

Electric reel motors

3 cutting units; offset design

Bedknife-to-reel adjustment

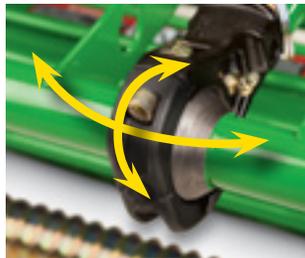

3-QA5 22-in. (59.9 cm) cutting units

2-pedal hydrostatic transmission

Exclusive offset design

The offset cutting units greatly reduce triplex ring with a simple change in direction.

Superb contour following

The exclusive ball joint suspension system provides exceptional contour following, steering with up to 18 degrees of side-to-side motion, and can rotate in any direction.

Grass catcher

Choose between direct-mounted catchers that are easy to put on and off and our unique weight-transferring catchers, which put less weight on the cutting unit.

Reduce double rolling

The tires are located well inside the cutting units to reduce or eliminate double rolling during straight-line passes.

Aercore™ 800

Got a Lot of Aeration Ahead of You? Put One of These Behind You.

John Deere aerators employ a Flexi-Link design to ensure the tines stay perpendicular longer for a higher-quality hole—without sacrificing efficiency. Easily accessible belts power the systems instead of chains, making them quieter and easier to maintain. For fast, quality results, they deliver every time.

Precision Tine Series

Our expanded lineup of aeration tines includes three tiers—Standard, Plus, and Ultra—making it easy for you to get the precise tine for your application. Machined from carbon alloy steel, every tine undergoes a proprietary heat treating process so you experience a strong, long-lasting tine with precise core integrity.

Aercore™ 800 Walk-Behind Aerater

Flexi-link coring system

25.0 hp (18.6 kW), 725 cc^{2.3} gas engine

31.5-in. (80 cm) coring swath

Up to 3.5-in. (88.9 mm) coring depth

Matched dual V-belts head drive

Lightweight design

TC125 Collection System

Makes cleaning up cores a breeze. A 25-cubic foot and 48-inch collection swath can clear the average green in 15 minutes. The adjustable roller height allows for varying turf and prevents aggressive brush wear.

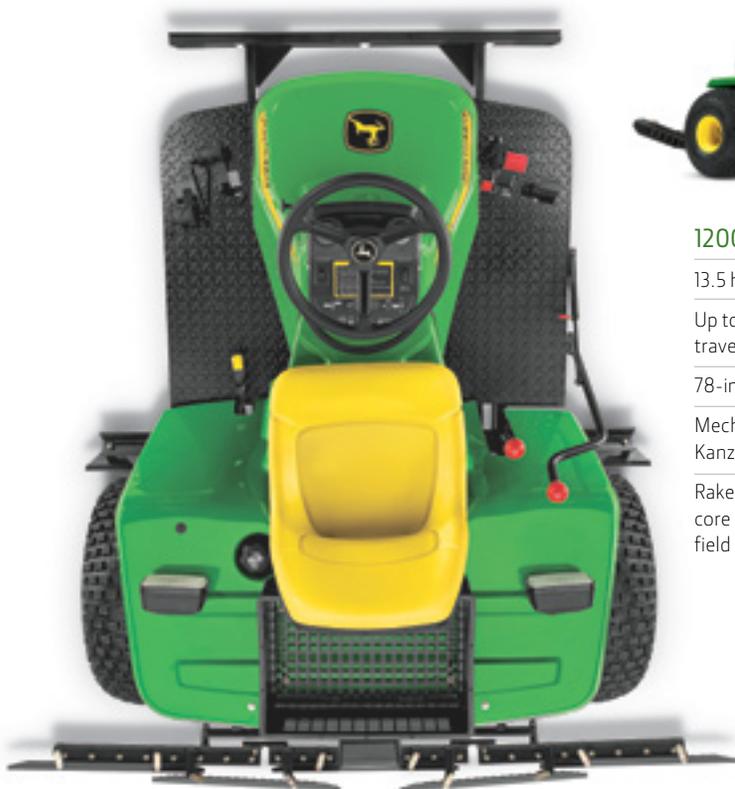

1200A Bunker Rake

TruFinish 1220

A Timeless Design. A Tireless Workhorse. An All-New Model.

Putting the finishing touches on a golf course bunker or a new-course construction project requires a delicate touch and excellent maneuverability. John Deere has two options that offer both—the gear-driven 1200A and the new hydraulic-driven TruFinish™ 1220 Utility Rake. Quiet, reliable, and comfortable for operators, these workhorses are relied on by courses all over the world.

1200A Bunker Rake

13.5 hp (10.1 kW), 401 cc^{2.4} gas engine

Up to 12.6 mph (0-20.3 km/h) travel speed

78-in. (1981 mm) rake width

Mechanical transmission with Kanzaki

Rake, cultivator, front blades, core removal blade, scarifier, scrapers, field finisher

NEW TruFinish™ 1220 Utility Rake

18 hp* (13.4 kW) engine

Up to 12-mph (0-19 km/h) travel speed

72-in. (183 cm) rake width

2WD/3WD selectable hydrostatic transmission

Multiple front, mid and rear attachments available

2020A PrecisionSprayer

The Focus is Pristine Greens and Fairways. With Precision, of Course.

Get to know the ProGator™ GPS PrecisionSprayers. The most accurate and proven GPS sprayers you can put on your course. So what separates these sprayers from the rest? Start with the AutoTrac™ Guidance System. The unit literally steers itself and sprays only where it needs to. Individual nozzle control reduces spray overlap and saves time and money. The 4640 Universal Display captures essential data. And, the StarFire 6000 Receiver utilizes the latest in Global Navigation Signal Processing Technology. Now, that's connected.

ProGator™ 2020A GPS PrecisionSprayer

34.0 hp (25.4 kW), 970 cc^{2.4} 4-cyl, liquid-cooled gas engine

AutoTrac™ Guidance System

Individual nozzle control

StarFire 6000 receiver, latest in signal-processing technology

Easy-to-learn 4640 Universal Display

ProGator™ 2030A GPS PrecisionSprayer

24.7-hp (18.4 kW) 3-cylinder, liquid cooled diesel engine

AutoTrac™ Guidance System

Individual nozzle control

StarFire 6000 receiver, latest in signal-processing technology

Easy-to-learn 4640 Universal Display

AutoTrac Guidance

Save time. Save money. Keep your hands free and your sprayer perfectly aligned. All with an easy-to-set-up system fully backed by your local John Deere dealer.

Trusted by the Best

HD200

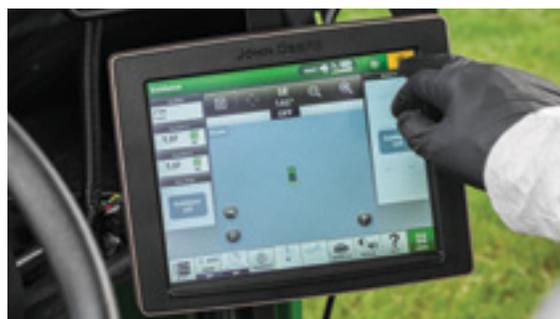

More Choices Than Any Other Line of Sprayers.

The SelectSpray™ Series spray system is built around flexibility and control. You can choose to equip one with a high-quality centrifugal or diaphragm pump, and when you need to move on to the next job, it all detaches in minutes, without tools.

4640 universal display

See more. Know more. Do more. Capture essential data—and see it whether you're sitting in the driver's seat or working in the office.

Display options

Two display options available, 4240 Universal Display or 4640 Universal Display.

HD200/H300 SelectSpray™

200 U.S. gal. (757 L) - HD200
300 U.S. gal. (757 L) - HD300

Hydraulically driven centrifugal or diaphragm pump

97 gpm (centrifugal), 30.1 gpm (diaphragm)

18-ft. boom option

15/21-ft. boom option

Automatic or manual rate controller

Triple nozzle bodies

Electrohydraulic lift system

Bidirectional breakaway boom system

TX Turf Gator

You Can't Have Enough Gator™ Utility Vehicles On Your Course

Step up to the enhanced Gator™ TX Turf and you'll appreciate a deluxe cargo box that includes 16.4 cubic feet of capacity, pick-up style tailgate, 20 tie-down points, and a gas-assist shock for easier lifting and dumping.

And, if you want to go electric, the TE can run all day on a single overnight charge and haul up to 500 pounds with the same deluxe cargo box you'll find on the TX. Plus, it's so quiet, you won't believe your ears.

Then there's the new Gator™ GS Electric Utility Vehicle. The GS Electric has a narrow stance and an 800-lb (363 kg) cargo box capacity. A gas model is also available.

If you're looking for Gator™ Utility Vehicles off the course, we have a full line of crossover and recreational utility vehicles as well.

GS

402 cc electronic, fuel-injected (EFI) gas engine
800-lb (363 kg) cargo box capacity
17.5-mph (28.2 km/h) top speed

GS Electric

48-volt electric system
800-lb (363 kg) cargo box capacity
17.5-mph (28.2 km/h) top speed

TX Turf

13.5 hp (10.1 kW), 401 cc^{2,4} gas engine
600-lb. (876 kg) cargo box capacity
15.5-mph (25 km/h) top speed

TE

48-volt electric system
500-lb. (272 kg) cargo box capacity
15-mph (24.5 km/h) top speed

ProGator™ 2020A

Engineered for the Long Haul

Let the heavy hauling begin. The 2020A features the only four-cylinder EFI gas engine in the category. With 34 hp* and 970 cc of hill-climbing torque, you'll get strength, raw power, performance, and easy maintenance. No wonder the gas 2020A and diesel 2030A are ideal for heavy hauling, spraying, and top dressing. Done hauling? These vehicles can be converted to a SelectSpray™ sprayer in just minutes, without tools.

ProGator™ 2020A Utility Vehicle

34.0 hp (25.4 kW), 970 cc^{2,4} 4-cyl, liquid-cooled gas engine

5-speed synchromesh transmission

Up to 3,510 lbs. (1592 kg) payload w/standard suspension and 4,251 lb. (1928 kg) payload w/heavy-duty suspension, 4-post ROPS, and wide rear tire kit. Includes 200 lb. operator, 200 lb. passenger, and loaded attachment.

19.1-mph (30.7 km/h) top speed

ProGator™ 2030A Utility Vehicle

24.7-hp (18.4 kW)⁶ 3-cyl, liquid-cooled diesel engine

5-speed synchromesh transmission

Up to 3,414 lbs. (1549 kg) payload w/standard suspension and 4,157 lb. (1886 kg) payload w/heavy-duty suspension, 4-post ROPS, and wide rear tire kit. Includes 200 lb. operator, 200 lb. passenger, and loaded attachment.

19.1-mph (30.7 km/h) top speed

2653B PrecisionCut

The 2653B is a Reel Mower to Rely On

The technology is simple. The cut is exceptional. With QA7 Quick Adjust cutting units specially designed for lush, dense turf and a smooth hydraulic drive system for even traction, excellent contour-following, and high power-to-weight ratio, the all-around 2653B offers a pristine cut anywhere on your course.

2653B PrecisionCut Trim and Surrounds Mower

19.6 hp (14.6 kW)⁶ diesel engine

26-in. or 30-in. QA7 cutting units

72-in. (183 cm) or 84-in. (213 cm) mowing width

John Deere Financial is a dependable link.

It's important to have your financing work as hard as your equipment does. John Deere Financial offers value no other lender can—a deep understanding of the golf industry, unmatched equipment expertise, and personalized financial solutions that can be quickly arranged through your dealer at the time of your purchase. Golf course after golf course, we've been here to make equipment financing easy and affordable. And we'll be here for you—for the long haul.

Service and support is on call.

With one of the most connected dealer networks in the world, we build trust with our Golf Course Superintendent partners, one golf course at a time. Our dealer network is our key to connect a fleet, helping you use data to guide decisions and manage your course with the latest tools and information. Of course, 24/7 parts and Onsite Mobile service helps too.

The Connections are Multiplying

Put a full lineup of John Deere equipment on your course. Talk with your dealer about digging into projects with John Deere Compact Utility Tractors for loader work or aerating. Or, bring in ZTrak™ Zero-Turn Mowers to quickly handle large tracks of common areas. Then, trust our compact construction equipment to help bring the odd renovation every course seems to have now and then to completion.

ShadePro™ canopy

Take your crew's comfort to the next level with a ShadePro™ canopy. This attachment can help you and your crew stay cooler on hot summer days. Along with overhead protection, ShadePro also features an adjustable fan to enhance air flow and limit free-flying grass, dust and debris. Be cool. Stay cool.

The latest options, attachments, implements and accessories are key.

Equipping your fleet right for every task on your golf course is easy. We offer a variety of attachments and accessories from aerators and top dressers to tire options, windshields and rearview mirrors. You need it? Chances are, we got it. Work with your dealer to find the right tools for your tasks on your course today.
